This bill amends the nursing education loan repayment program in three ways.

2. It specifies that applicants must indicate an intention to work as full-time nursing faculty in a nursing education program in the State, and increases that required commitment from 3 years to 5 years after acceptance into the nursing education loan repayment program.
3. It increases the maximum amount of loans eligible for repayment under the program from \$4,500 to \$30,000 for a master's degree and from \$6,000 to \$60,000 for a doctoral degree.

This is a refile of a bill that died at the end of session last year (LD 799). However, this bill is consistent with the bill as filed last year; it is not consistent with the amendment. (Last year's amendment significantly expanded who could qualify for loan forgiveness beyond nurses.)

2. It allows patients receiving MaineCare health services to provide verbal, electronic or written consent to telehealth and telemonitoring services.
3. It makes clear that a health insurance carrier must provide coverage for a health care service through telehealth as long as the provider is acting within the scope of practice of the provider's license and in accordance with any rules adopted by the board that issued the provider's license related to standards of practice for the delivery of a health care service through telehealth. It also removes restrictions related to the technology used to provide services through telehealth.
4. It prohibits a carrier from placing any restriction on the prescribing of medication through telehealth by a provider whose scope of practice includes prescribing medication that is more restrictive than any requirement in state and federal law for prescribing medication through in-person consultation.
5. It clarifies that the availability of health care services through telehealth may not be considered for the purposes of demonstrating network adequacy.

Sponsor: Rep. Mathieson <http://www.legislature.maine.gov/LawMakerWeb/summary.asp?ID=280079313>

Health Coverage, Insurance & Financial Services **Committee Status:** ONTP
Public Hearing: 5/6/2021 10:00 AM **Final Status:** DEAD

This bill makes permanent the authorization for the delivery of health care services through telehealth by telephone that was provided through executive order during the declared public health emergency related to COVID-19.

Under current law, health insurance carriers are required to reimburse for services delivered through telehealth at parity with the reimbursement that would be provided if the services were delivered through an in-person consultation, but the use of audio-only telephone to deliver those services is not permitted. This bill removes that prohibition. The bill also clarifies that reimbursement for telehealth services must be made on the same basis and at the same rate as if the services were delivered in person and that a carrier may not establish separate deductible limits for telehealth services that are not applied in the aggregate with other services covered under a health plan.

Under current law, telehealth services reimbursed under the MaineCare program for the delivery of service using the telephone are limited to when interactive telehealth services are unavailable or when a telephonic service is medically appropriate for the underlying covered service. This bill removes that limitation and also clarifies that services provided through telehealth must be reimbursed at the same rate as comparable services provided through an in-person consultation.

The requirements in the bill apply to health plans issued or renewed on or after January 1, 2022.
